

Webinar today at noon: Telemedicine During the Pandemic and Beyond

OVMA will host a webinar today at noon called Telemedicine During the Pandemic and Beyond. The webinar will be presented by Dr. Sharon Quinn and Michael Parent from [Smart.Vet](#).

Spring is usually the busiest time for most veterinary practices but with the pandemic, clinic teams have been forced to adopt new ways to continue patient care. Telemedicine can provide a valuable solution for practices, clients and patients. This 45-minute webinar will highlight:

- What clinic teams are doing now using telemedicine.
- What a telemedicine platform can do for you.
- Why you should charge for virtual consults (and how to do it).
- How to use telemedicine.

The webinar will be recorded and made available for OVMA members on the OVMA website.
