SEMINARS 2018

ALL SEMINARS TAKE PLACE FROM 7:30 – 10 pm (dinner served at 7 pm)

HOSPITAL 2018 Seminar Series

*Each Lecture is 2.5 Continuing
Education Credits*

The lectures in the Hospital Personnel Seminar Series are provided for the educational benefit of all hospital staff, including Veterinary Series members, technicians, assistants, groomers, reception and all office personnel.

BENEFITS

- Seven comprehensive continuing education seminars featuring some of Ontario's most prominent speakers
- Comprehensive speaker notes available on the TAVM website
- Attendees of the Hospital Personnel lecture series from a clinic with a Veterinary Series member, receive a 10% discount on membership fees
- TAVM online newsletter "The Scalpel"
- Buffet dinner included, beginning at 7 pm

Memberships are NOT refundable. A membership may be transferred only ONCE per calendar year (1 week notice must be given).

Did you graduate in 2017, 2016 or 2015?

TAVM is offering recent DVM or RVT program graduates **one free lecture** at either our Veterinary or Hospital Personnel Seminar Series. Please contact TAVM at info@tavm.org for more information and to request your lecture of choice.

FEBRUARY 14

A Variety of Topical Issues

This series of lectures will cover the following topical issues in veterinary medicine:

Judy Brown, DVM, MSc, Diplomate ACVECC

How to Save a Life

Patients can deteriorate quickly if we are not attuned to the severity of their illness. Learn how to recognize the signs of shock and impending deterioration, and how to intervene before it's too late.

Nicole Rolfe, BScH, DVM, DACVAA

How to Make Anesthesia Great (Again!)

When you are doing everything right, anesthesia can be great. But with anything as detailed as anesthesia, analgesia and sedation, doing everything right is hard to do. There are many things we can do to make anesthesia safer and reduce the risk of complications. The most common mishaps, mistakes and omissions will be explored to show areas we can improve how we deliver anesthesia to our veterinary patients.

Veterinary Emergency Clinic and Referral Hospital

SPONSOR: Hill's Pet Nutrition

MARCH 7

Ophtho 101 – How to Survive Eye Cases

SPEAKER: Nick Whelan, BVSc, MVSc, MACVSc, Diplomate ACVCP, Diplomate ACVO
Animal Eye Clinic of Waterloo Region

The phone rings. On the line an owner is calling about their pet's eye problems. How do you respond? What questions do you ask? How do you interpret the answers, decide when they need to come to the clinic? Along with phone triage, we will discuss history questions, performing an ophthalmic exam, ocular diagnostic tests and common eye diseases.

APRIL 11

An Introduction to Rehabilitation in Small Animal Practice

SPEAKER: Anne Sylvestre, DBSc, DVM, DVSc, CCRP, Diplomate ACVS/ECVS
Focus and Flourish

In this session videos will be used to demonstrate some of the basic but most important rehabilitation treatment modalities. These exercises will be useful for many patients in a small animal practice. Bandaging is something that we were all taught at some point in school but, months and years later, when the time comes to put the information into practice, important details are forgotten. This talk will focus on the proper application of a bandage and how to minimize problems that often arise with bandages.

SPONSOR: CDMV

MAY 9

An Update on Lower Urinary Tract Disorders in Dogs and Cats

SPEAKER: Doreen Houston, DVM, DVSc, Diplomate ACVIM (Internal Medicine)
Doreen Houston Consulting

Pee. It's all about pee. A look at what's new in the diagnosis and management of Idiopathic cystitis, urinary tract infection and crystal and stone disease in dogs and cats. How do I know which is causing the inappropriate urination and clinical signs in my patient and how do I prevent the problem from happening again!

SPONSOR: Royal Canin Canada

SEPTEMBER 19

Animal Hospice and Palliative Care

SPEAKER: Faith Banks, DVM
Midtown Mobile Veterinary Services

Animal hospice and palliative care is a relatively new field in veterinary medicine. We will discuss ways to help you assess a pet's quality of life which you can bring back to your veterinary clinic. You will have tools to help owner's make important decision on euthanasia, instead of telling them "you will know when it is time".

SPONSOR: OVC Pet Trust

OCTOBER 3

Feline Medicine Update

SPEAKER: Susan Little, DVM, DABVP (Feline)
Bytown Cat Hospital

This feline medicine seminar will focus on common clinic problems regularly seen in practice. We will discuss practical diagnostic approaches, relevant pathophysiology, current treatment recommendations, and client support for osteoarthritis and diabetes mellitus. These chronic diseases mean clients need ongoing support to help care for their pet and veterinary technicians play an important role in managing these diseases.

SPONSOR: Cat Healthy

NOVEMBER 7

Everything You Need to Know About Immune Mediated Diseases: IMHA, ITP, NIRMA

SPEAKER: Jennifer Kyes, DVM
Mississauga Oakville Veterinary Emergency Hospital

Immune mediated hemolytic anemia (IMHA) and thrombocytopenia (ITP) are two of the most devastating and rapidly fatal diseases of domestic dogs. We are seeing an increase in not only IMHA and ITP but also in a less commonly seen form called non-regenerative immune mediated anemia (NRIMA). The focus of this lecture is to increase awareness of these conditions, help you to identifying their unique features, and to provide you with treatment options.

*Please bring a sweater
or jacket for your
comfort, as room
temperature can vary.*
